EXPERIENCE

Literacy Connects, Tucson AZ — IT/Web Designer

Jan 2019- Jan 2020

I updated the website's content & gave suggestions on SEO and website performance feedback, such as image optimization to reduce loading speed, disabling plugins running in the background irrelevant to the page, and palette suggestions, etc. This role was memorable to me because it was a good experience to showcase my ability to be useful in other areas and multi-task: hardware, software, and networking.

SBCCLA, LA, California — Web Designer

May 2017 - October 2017

Rejuvenated their website from it's lowest point in their earlier stages of their organization. Applied UX/UI practices to make sure the user experience was minimal, memorable, consistent & spoke SBCCLA throughout the entire site. <https://www.sbccthrivela.org/>

Desert View High School, Tucson, AZ — Front End Developer

May 2016 - May 2018

As an AP CS student, I began to work for my school's IT department and helped update the front-end of our schools homepage using CSS & HTML. <https://www.susd12.org/desert-view> (The page I worked on)
